Subject: Regarding observation of "DRY DAY" every Friday in all Government offices in the State for prevention of Dengue.

Dear Ch Ramesh,

As you all know that an upsurge in number of cases of dengue is witnessed in the State of Punjab during monsoon. Mosquito responsible for spread of dengue (Aedes aegypti) breeds in artificial collection of clean water like Desert coolers, Over head water tanks, Pots, Trays of refrigerators, junk, flower vases etc.

Department of Health and Family Welfare, Punjab has declared every Friday as "DRY DAY" which means that every Friday, the coolers and other water containers mentioned above, used in government offices should be cleaned and dried in order to prevent breeding of mosquito.

You are requested to circulate these guidelines to your offices in the State of Punjab for compliance. If breeding of mosquito is reported from any of your office by the team of Department of Local Govt or Department of Health, the officer incharge of the concerned office will be issued a challan and appropriate action will be taken under MC Act 1911 clause no. 211,219 and Punjab Municipal Corporation Act 1976 clause no 302, 323 and sub clause (1) of 323.

I am hopeful that you will look personally into this and instructions will be issued to the offices of your department in the State for strict compliance.

Regards

Yours Sincerely,

(Vini Mahajan)

Mr. Ramesh
